## RADOX EN 50306-2 300V M

### Product description:

**RADOX EN 50306-2 300V M** Single cores with thin wall insulation  
 Nominal voltage: 300 / 500 V AC  
 Hazard level: M (extra low temperature resistant, extra oil and fuel resistant)

### General features:

Halogen-free electron-beam cross linked cores with improved behaviour in case of fire, easy to strip, soldering resistant and flexible. Compliant with the requirements of the EN 50306-2 standard.

### Application:

The cores are intended for fixed installation inside railway vehicles or for installation in applications where limited alternating bending stresses occur during operation.  
 The requirements contained in the EN 50355 and EN 50343 standards are applicable with regard to installation.  
 The cores are used as sub-components in cables according to EN 50306-3 and EN 50306-4.

### General composition of cable :

1. Conductor: stranded tin plated copper, acc. to EN 50306-2
2. Insulation: RADOX EI 306  
Colors: white or green-yellow, black marked

Marking: HUBER+SUHNER RADOX-EN 50306-2 300 V 1X[ $\varnothing$ cross section] M [part. No. + batch. No.] [date of manufacture]

### NB:

The upper temperature limit is determined by long term ageing according to EN 50305 Par. 7 and extrapolation to 20,000 hours.  
 The lower temperature limit is determined by bending and elongation tests according to EN 60811-1-4 Par. 8.  
 The specified bending radii require a careful and proper handling using proven fastening technologies.
