Petroleum jelly filled, screened telecommunication cable intended for installation outdoors in ground or ducts.

## DESCRIPTION

### Design

Pair-twisted, petroleum-jelly filled, screened and PE-sheathed telecommunication cable. The cable is designed in accordance with the Finnish Standard SFS 5012. The a-wire of the pair has a stripe of same colour as the b-wire, which simplifies the identification when terminating the cable. VMOHBU-TL is used for telephony and digital communication (xDSL) in the access network. The sheath is marked with e.g. "VMOHBU-TL 10x2x0.5 NEXANS GS" year month + metre marking

### Quality system

Design, manufacture and testing according to the requirements in ISO 9001.

### Environmental management system

The activities at our plant in Grimsås are certified to ISO 14001.
