

Construction Products Regulation EU No 305/2011

The rules of Member States require that construction works be designed and executed so as not to endanger the safety of persons, domestic animals or property nor damage the environment.

Those rules have a direct influence on the requirements of construction products. Those requirements are consequently reflected in national product standards, national technical approvals and other national technical specifications and provisions related to construction products. Due to their disparity, those requirements hinder trade within the Union.

This Regulation should not affect the right of Member States to specify the requirements they deem necessary to ensure the protection of health, the environment and workers when using construction products.

Member States have introduced provisions, including requirements, relating not only to safety of buildings and other construction works but also to health, durability, energy economy, protection of the environment, economic aspects, and other important aspects in the public interest. Laws, regulations, administrative measures or case-law, established either at Union or Member State level, concerning construction works may have an impact on the requirements of construction products. Since their effect on the functioning of the internal market is likely to be very similar, it is appropriate to consider such laws, regulations, administrative measures or case-law as 'provisions' for the purposes of this Regulation.

Where applicable, provisions for an intended use or uses of a construction product in a Member State, aimed at fulfilling basic requirements for construction works, determine the essential characteristics the performance of which should be declared. In order to avoid an empty declaration of performance, at least one of the essential characteristics of a construction product which are relevant for the declared use or uses should be declared

For the above, it should be noted that generally the articles sold by Tiemme Raccorderie SpA not covered by this Directive because they are not part of the category "construction products", but to comply with the requirements of Regulation UE **305/2011**

TIEMME RACCORDERIE S.p.A.

DECLARES

that the products supplied are in accordance with this Regulation as the Quality System meets the ISO 9001:2008 KIWA Certificate N° KI052300, and that makes available to customers, on request, any technical data, approvals, declarations of conformity and its experience for the exact use of it

DECLINES

liability for any accidents to persons or objects resulting from tampering or from incorrect/unsuitable use or installation of products.

The Technical Director
