

25th June 2019

We can confirm that ATI products comply with RoHS3: 2015/863. Information received from our supplier's compliance statements certify that raw materials we purchase and within our process the chemical substances listed below are not intentionally used or added any of to the goods supplied to you. Therefore, their presence in raw materials we purchase and pressure-sensitive adhesive tape we manufacture is unexpected at above the levels indicated within RoHS3: 2015/863 as outlined below:

1. Lead (Pb) (0.1%)
2. Mercury (Hg) (0.1%)
3. Cadmium (Cd) (0.01%)
4. Hexavalent chromium (Cr ^{VI+}) (0.1%)
5. Polybrominated biphenyls (PBB) (0.1%)
6. Polybrominated diphenyl ethers (PBDE) (0.1%)
7. Diisobutyl phthalate (DIBP) (0.1%)
8. Bis (2-ethylhexyl) phthalate (DEHP) (0.1%)
9. Butyl benzyl phthalate (BBP) (0.1%)
10. Dibutyl phthalate (DBP) (0.1%)

Although the above-mentioned substances as such are not intentionally added the absence has not been checked by tests, therefore this does not exclude the presence of negligibly slight traces due to, amongst others, impurities in the components supplied by external parties and used in the production of such components.
