SD-77

SD-100

MD-751

- ※ Please cut MD ducts slowly in all seasons.
- ※ The number shown in the upper figure is estimated based on the condition that the blade is not dull or chipped.

Insert the duct at a 90° angle to the blade.

Please hold the duct straight.

Reduce the cutting speed when the blade reaches the position A.

Precautions

- ① Please wear safety goggles or glasses for your own safety.
- ② Please be careful not to get your fingers caught in the moving parts.
- ③ Please keep your fingers and hands away from the blade.
- ④ Do not use the tool for any purpose other than cutting ducts.
- ⑤ Do not cut any duct apart from the designated size.
- ⑥ To avoid ducts from cracking at low temperatures, cut the ducts very slowly or after heating the ducts with hot air.
- ⑦ The duct edge may be slanted depending on the angle of the cut.
- ⑧ Do not throw or drop the tool, as this could damage the body itself or the blade receiver.

Warnings

Do not touch the blade with your fingers directly since the blade is very sharp.
Moreover, please wear safety gloves while you cut ducts or replace the blade.
