INFO! When a text box is this colour, it means that it contains important information.

SAFETY INSTRUCTION

- To avoid the risk of fire, electric shock or injury, read all the safety instructions and warning texts before using the unit.
- All electrical connections must be carried out by qualified electricians.
- If the power lead is damaged, it must be replaced by the manufacturer, the manufacturer's service agent or a similarly qualified person.
- The unit must not be used to extract combustible or flammable gases.
- It is the installer's responsibility to carry out a full safety and function assessment of the appliance.
- All electrical power to the unit must be shut off before carrying out service or maintenance, including cleaning:
 1. Switch off the unit in the following menu on the handheld terminal:
'Start page > SWITCHOVER SERVICE > OFF'
 2. Wait until the unit has stopped.
 3. Switch off the all-pole switch.

- This unit is only designed for ventilation air in homes and commercial buildings.
- To maintain a good indoor climate, comply with regulations and avoid condensation damage, the unit must never be stopped apart from during service/ maintenance or in connection with an accident.
- The unit must not be operated without the filters being in place.
- All plumbing work must be carried out by an authorised plumber.
- The location of the water battery must be approved by a plumber owing to the risk of water leaks.
- Check whether the unit's operating voltage is 400V or 230V.
- The electric battery must be configured in accordance with the operating voltage.

1. Installing an electrical heating battery

1.1. 3N~400 V

Fit the supplied long cam clip as shown.

1.2. 3~230 V

Fit the three supplied cam clips as shown.

INFO!

230 V only applies in Norway.

2. S100R, S140R, S180R, S220R, S240R, S260R
