

PELTOR™
Protection & Communication

Keep connected while protected.

3M™ PELTOR™ WS™ ALERT™ XP Headset 
Third Gen XP - Now with App support

Turn your hearing protection into a quiet office you wear to work. Conduct business from inside your headset by connecting to your mobile device using Bluetooth® technology. Talk in a normal volume even in noisy environments by using the noise-canceling boom microphone.

Registering your headset with the 3M™ Connected Equipment App allows you to easily navigate the headset's menus and adjust all of the settings, including the ambient listening volume and programmable FM radio stations.

3M Science. Applied to life.™

Keep working while conversing.

Turn your hearing protection into a quiet office you wear to work. In low noise, the ambient/environmental microphones can increase your ability to communicate with nearby colleagues as well as hear warning signals, approaching vehicles, and critical other machine sounds or processes to help keep you safe.

Voice-guided menus

Navigate ON/OFF, volume, and menus – all while wearing gloves. No need to remove the headset for any adjustments. Get immediate voice confirmation after every setting adjustment, including a “low battery” voice alert.

Push-to-Listen function

The Push-to-listen (PTL) feature allows you to instantly pause your Bluetooth® streaming or turn off the FM radio volume, while increasing your ambient/environmental listening ability, without being tempted to remove your headset.

Ambient/Environmental microphones help promote auditory situational awareness.

Ambient microphones help you hear oncoming vehicles, alerts, and other warning signals while providing hearing protection when you need it.

Bluetooth® connectivity

Simultaneous, seamless connection to Bluetooth® devices allows for flexibility and mobility. While keeping your hearing protection on, you can easily setup and adjust the headset functions using the iOS and Android compatible mobile 3M™ Connected Equipment App on your phone.

Carry on conversations

Since the headset comes with a noise-cancelling boom microphone, you can stop shouting and now speak in a normal volume.

Built in FM-Radio

With vocalized channel selection

Durable, practical electronics

To help reduce corrosion caused by sweat, the electronics are located in the outer part of the cup. The dual-shell design helps protect the electronics from moisture.

Two models: Headband or helmet attachment

Both feature long-lasting, stainless steel wire bands that can help provide consistent wear.

Power saving options

Auto-OFF after 4 hours of non-use. Uses two AA alkaline batteries (or optional LR6NM NiMH rechargeable batteries).

“Since my employees and I usually work at different places on the farm at the same time, we need to discuss issues continuously throughout the working days. I can easily keep in touch with them through the help of my headset. The best thing about the headset is how robust it is and how it can handle all the different environments we work in, both dirty and noisy surroundings, where I can have my hands free to work while I talk to my employees and others. My PELTOR headset almost feels like a colleague I do not want to be without.”

Martin, Farmer

Get the app using the QR codes below

3M™ Connected Equipment

You can download the 3M™ Connected Equipment app that provides ready access to:

- Easily navigate the headset’s menus to set and adjust all of its settings
- Hygiene kit reminder to let you know when it is time to change the cushions and foamliners
- User Instructions (both as text and videos)
- Guides
- FAQs
- Tech support contacts
- Important tech data sheet information

App Store (iOS)

Google Play (Android)

This mobile app is free of charge and is part of the 3M™ Connected Equipment suite, which enables users to manage, operate and view the status of all your 3M Connected personal protective equipment in one place.

The headset app comes in English as well as several other language options and is iOS and Android compatible.

Hearing protection with enhanced situational awareness

In low noise, ambient/environmental microphones can increase your ability to communicate with nearby colleagues, as well as hear warning signals, approaching vehicles and other machine sounds or processes when needed.

“During the manufacturing process, it is important that everything is done in the right order and that nothing goes wrong so we can produce the most amount of beverage for our customers. By using these PELTOR headsets we can easily connect into a mobile group call and talk to each other while still working in this noisy environment where we are apart from one another. If something goes wrong in the manufacturing line, we can quickly remedy the problem and work efficiently without interruptions. Once you start using this headset, you do not understand how you can manage without it.”

Anders, Brewery worker
