

# New ARIA flat air distribution system for optimal air flow

that **fits perfectly** with round components of our HEATPEX ARIA CONNECT system

The only system that combines flat and round components of the HEATPEX ARIA CONNECT system, ensuring maximum ventilation efficiency in every room.

## Ultra-Low Profile – Only 5 cm High!

Designed specifically for compact spaces, ARIA FLAT500 ensures seamless duct routing without compromising on airflow efficiency.

Low pipe profile – only 50 mm in height.

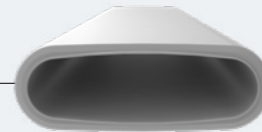

Other system components – only 60 mm in height.

## Modularity and installation flexibility

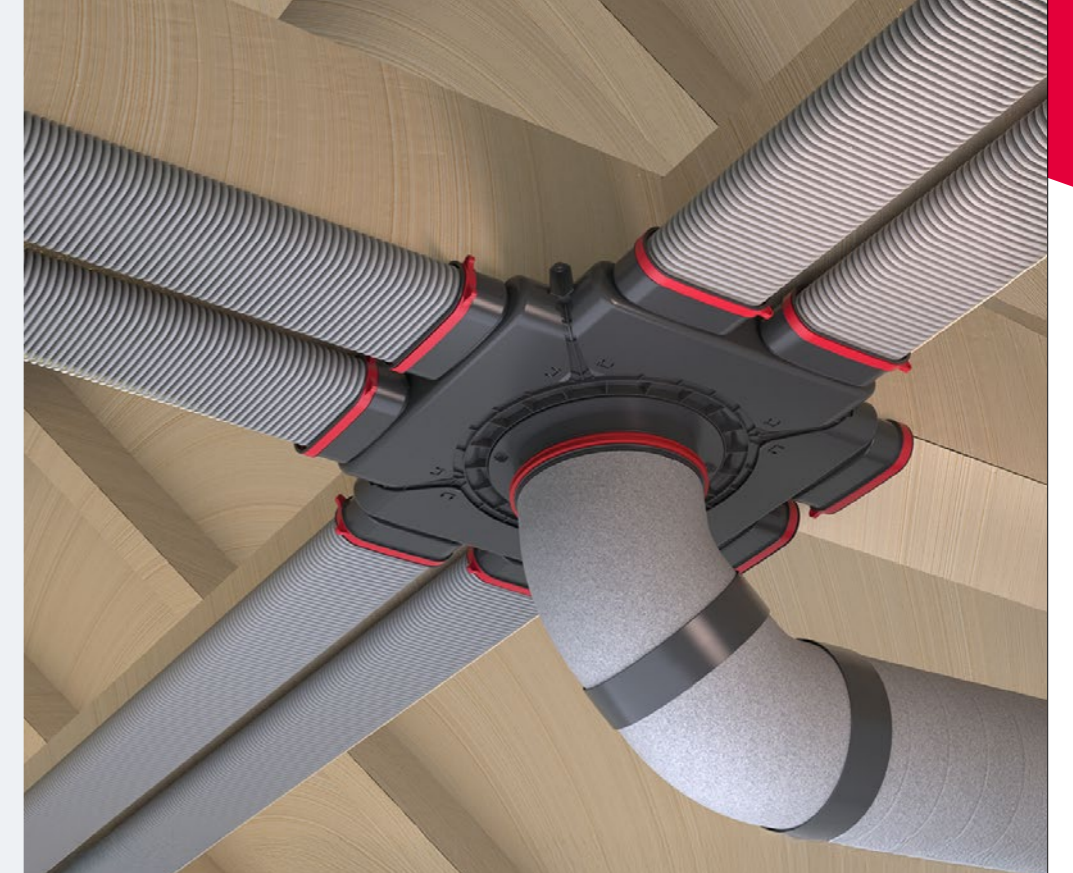

Specially designed mounting elements simplify installation in hard-to-reach areas, making ARIA FLAT500 a perfect fit for complex projects.

Expanding box enables the installation of an air inlet in the floor.

## Unmatched Durability

A robust duct profile and dedicated gaskets ensure ACT1 air tightness level while delivering quiet and efficient performance.

# ARIA FLAT500

## Perfect for tight spaces flat air distribution system

Market-proven ONE-CLICK technology

ATC-1 air tightness level

NEW

INNOVATIVE VENTILATION FOR MAXIMUM EFFICIENCY
