

LiveLink

Starter Kit

EAN 4007841033958

Functional description

LiveLink starter kit for classrooms consists of the LiveLink Control Box, the IR Quattro HD LiveLink presence detector and the DALI 4x push-button coupler for use in large rooms, such as classrooms or conference rooms. The system is configured and started up via the LiveLink app and can be controlled very easily via tablet or smartphone. LiveLink Control Box: the control device features a DALI interface and can be controlled via tablet, smartphone or push button. It can operate up to 16 light groups and 64 individual components. An integrated, autonomously encrypted Wi-Fi network provides optimum connection and security. LiveLink push-button coupler: the LiveLink push-button coupler provides the capability of integrating up to 4 standard push buttons into the the LiveLink system. It can be installed simply behind the push buttons in the concealed box. Saved lighting scenes can be assigned to individual push buttons, making them available for selection in everyday use at the press of a button.
