### Functional description

Most motion detectors sit around inconspicuously on a wall or ceiling. The sensIQ is different. Its design is so spectacular that it's a stylish signature on any facade, automatically attracting admiring glances. Behind its internationally acclaimed form is intelligent technology that puts virtually everything else in the shade. Unmatched, the detection reach of the four pyro sensors can easily be scaled in three directions via control dials – instead of shrouds of the type normally used on most other motion detectors. The floating module permits further functions, and you can use the newly available eNet version to integrate the sensor into existing eNet wireless networks.
