

ESHIELD

Protection for temperature controllers against unauthorized removal and tampering

- Thermostat protection – prevents unauthorized access, removal, and changes to settings.
- For public facilities – ideal for hotels, schools, offices, public institutions, and other publicly accessible areas.
- Universal compatibility – suitable for EONE, EFAN, E40, E25, E20i, E10, E7, E4, EASY, ESIMPLE, and EHW thermostats.
- Easy installation – wall-mounted or installed on a standard electrical back box.
- Full thermostat functionality – maintained thanks to ventilation openings and the transparent housing.
- Secure locking – dedicated key included.

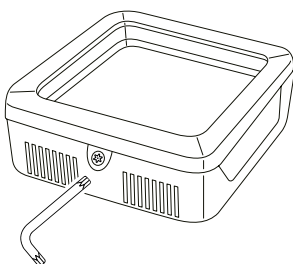

TECHNICAL INFORMATION

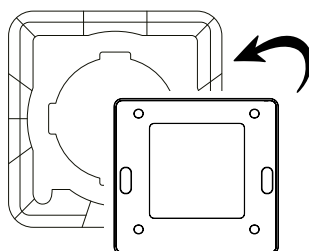

Dimensions	108 × 108 × 35 mm
Material	Plastic
Colour	Transparent

INSTALLATION

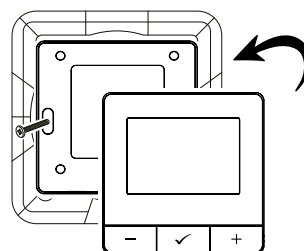

1. Loosen the screw and open the ESHIELD housing using the dedicated tool included in the package.

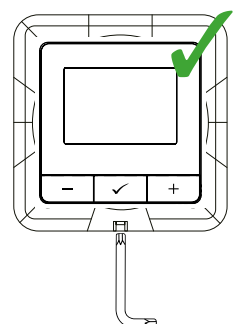

2. Position the bottom part of the ESHIELD housing on the wall and secure the thermostat backplate using 2 screws.

3. Attach the thermostat to the backplate inside the ESHIELD housing.

4. Close the ESHIELD housing and tighten the screw using the dedicated tool.

NOTE:

Switch off the power supply to the thermostat before installing the housing.
