

Accessory

# RS PRO orientation light module MLED 1A (battery-powered)

EAN 4007841732912

## Functional description

LEDs for automatic orientation light. Automatic rechargeable battery operation in the event of supply voltage failure. In the battery-powered version, the orientation light is charged from mains power and then operates in the same way as the MLED1 version. The clever part: in the event of a power cut, the module automatically switches over to rechargeable battery-powered operation. The LEDs shine irrespectively of ambient brightness and help to show the way.

## Technical specifications

<b>Dimensions (L x W x H)</b>	78 x 87 x 43 mm
<b>IP rating</b>	IP20
<b>Colour</b>	white
<b>Manufacturer's Warranty</b>	5 years
