

Attention! Electrostatic sensitive device

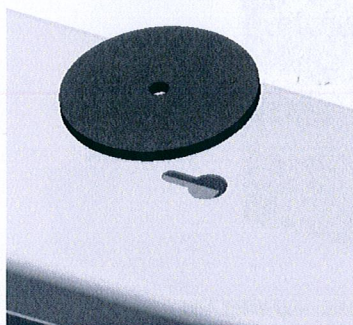

Instruction

NEMBUS is a sealed luminaire for general lighting. Including LED driver and light source LED. Type label with product data is placed inside fixture.

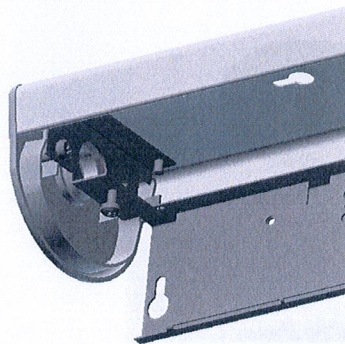

Montage

Cable entry and mounting measures according to drawing above.

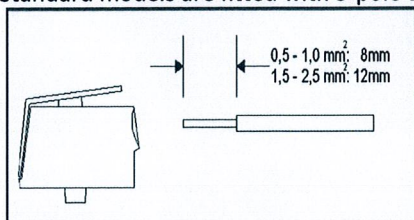

Use supplied rubber washers between luminaire and ceiling

Use hooks for assembly plate while installing cables

Wiring

Standard models are fitted with 5-pole terminal. –DALI models have extra 2-pole terminal for regulation.

Service

Disconnect power supply before working on the fixture. If converter/driver is to be exchanged, careful attention should be taken to important parameters such as e.g. maximum power, constant current, voltage range and efficiency.
