

Shelly GaN Charger 65W

Dual-port USB-C and USB-A wall charger, white

EAN code: 3800238074517

Product description

Shelly GaN Charger 65W is a compact dual-port wall charger with one USB-C and one USB-A output. USB-C alone delivers up to 65 W – enough to charge a laptop at full speed – and with both ports in use the power is split as 45 W on USB-C and 18 W on USB-A, so a laptop and a phone can charge together. GaN technology keeps the housing small and cool.

This is not a smart device. It has no Wi-Fi and no Bluetooth, cannot be added to the Shelly Smart Control app and has no buttons or settings – it exists to deliver stable power. That makes it a dependable supply for the Shelly devices powered over USB, among them Shelly Camera, Shelly Presence and The Pill by Shelly.

The output sits at 5 V by default and switches to fast charging on its own when a compatible device is connected. Five built-in protections cover overheating, overvoltage, overcurrent, short circuit and overpower, and the charger is TÜV SÜD certified. No USB cable is included – any standard cable works.

Technical data

Physical	
Size:	46 x 28 x 83 mm
Weight:	[TBC]
Shell material / color:	Plastic / White
Ports:	1 x USB-C, 1 x USB-A
Plug:	EU, CEE 7/16 Also fits Schuko and type E sockets
