

**PSWC
PERFORATED
EXTRACT AIR
DIFFUSER**

**BENEFITS OF THE PSWC
EXTRACT AIR DIFFUSER**

- Fits false ceiling grid 600x600 mm
- Wide airflow range
- Low noise levels even at high airflows (sound attenuation available as an option)
- Ideal for use as the central extract device in DCV systems
- Openable front plate allows easy access for cleaning
- Diffuser plate painted in RAL 9003

Silent high capacity ceiling extract air diffuser

PSWC extract diffuser is designed to provide high extraction performance combined with low noise levels in false ceiling installations.

The integrated plenum box diffuser has a very wide airflow range and can therefore be successfully used in DCV system applications. It is available in two versions: with or without sound attenuation material. The diffuser front plate is attached with magnets, allowing it to be easily removed for cleaning purposes.
