

Incandescent lamps

Linear decorative

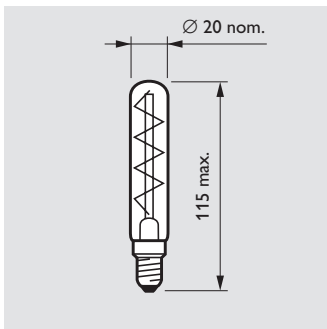

T20

Normal incandescent gas-filled lamps with a candle-shaped glass bulb and a single-coil filament. They are designed for use in functional and/or decorative applications.

The Mini-Colorenta (20 mm) is a slim clear version with E14 base, offering especially brilliant and decorative lighting effects thanks to their decorative filament and clear-finish lighting effects. Burning position: universal.

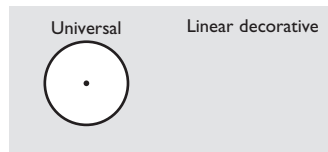

Applications

Used decoratively in candelabras, piano lighting and wall brackets (e.g. for paintings) in homes, hotels, restaurants, shops, and theatres.
