

FO-103D

Dual hole stripper

- 1 hole for stripping 900µm to 250 µm and the second hole for stripping from 250µm buffer coating to 125 µm
- Precision diameter hole & V-opening in blade allow for accurate buffer coating removal
- Allows longer stripping length
- Pivot pin, spring and precision handles enhance tool functionality and durability
- Factory set, requires no adjustments
- Prevents scratching or nicking of optical fibre
- Easy to read stripping diagram imprinted on the handle
- All cutting surfaces are precision formed, hardened , tempered and ground assuring precise buffer removal
- Made in USA
