

## C2 SmartLight Street – versatile tools for lighting control

The **C2 SmartLight Street** product family provides versatile tools for the control, monitoring, and maintenance surveillance of outdoor lighting in industrial areas, on individual properties, and in cities. The solution can be used for remote control and monitoring of a number of independent control areas. The lighting infrastructure can be managed via a Web browser. The Street solution issues an alarm if there is trouble and provides centre-specific information on when and where lights are switched on, and for how long.

The modular Street product package includes basic functions but can be easily expanded with additional modules, such as supplementary relays. The measuring station for the Street solution, consisting of three brightness measurement units, ensures that the lights are switched on and off at the right times in all control areas.

### Names and electrical codes for the Street equipment

Product package	Electrical code	Contents
C2 SmartLight Street	2614101	C2PU power supply unit, C2CU central processing unit, C2ANT antenna, C2MCABLE module cable
C2 SmartLight LUX	2614103	3 x C2PU power supply unit, 3 x C2CU central processing unit, 3 x C2LM brightness sensor, 3 x C2ANT antenna, 3 x C2xMCABLE module cable (8 m), 3 x C2PCABLE power cable
